## **YOUR INPUT REQUESTED**

The Fire Chief and the Fire District Board are taking a hard look at our trucks and our stations. There is a range of ideas and opinions about whether or not we should replace some or all of our equipment and if so with what, and we are only at the very beginning of developing plans for a new station.

Chief Appleton is asking for citizen input in this process. Ultimately we may form an advisory committee made up of District Volunteers, Board, Chief, and general public. At this time all we're asking for is feedback and ideas.

If you have interest or expertise in how public funds are spent on fire equipment and facilities, and in the services we provide, we'd like to hear from you.

You can find more information on our website, [www.mosierfire.com](http://www.mosierfire.com), including a breakdown of current apparatus and facilities, and a projection of replacement options and costs relative to our budget and borrowing limit.

You can leave comments on the website, or you can contact us by email.

And anyone is welcome and encouraged to attend the next few Board meetings, as this topic is one of our main agenda items. Meetings will be second Thursdays:

**November 14, December 12, and January 9**, 7 PM at 208 Washington St.
